

GROM Adapters – digital car kits for integration of the
Android® Smartphone and Tablet, iPod® / iPhone®, USB Drive, Bluetooth®, MP3 player
into Car Stereo System
Application Guide

GROM adapters allow you to integrate USB Stick, MP3, In-Car Bluetooth, Android Phone, iPod / iPhone into car stereo system, control your portable device (except MP3 player) through CD changer controls on the Car Stereo, and get the premium digital sound quality without using FM modulators. Bluetooth will allow you to use your mobile phone hands free and get wireless music playback with integrated stereo controls. To gain Bluetooth functionality additional GROM-BTD Bluetooth Dongle is needed for USB3, IPD4, MST4 units. Bluetooth Dongle is not needed for GROM-BT3 modules, as the GROM-BT3 has integrated Bluetooth.

Comments:

1. *Models with DSP will require **DSP Converter from GROM Audio**To determine if your car has DSP, check the guide at http://gromaudio.com/docs/bmw-dsp_application.pdf
2. All BMW monochrome radios will not allow for TEXT to be displayed.
3. ** For BMW with fiber-optic stereos. BMW must have MP3 CDC capability. If there is no such capability, the stereo must be coded for CDC at the dealership or car stereo shop.

4. * Important for 2005+ BMW X3; 2006+ BMW Z4:**

BMW X3 (E83) production date 09/05 and up with DSP **without** navigation, CD changer **and** iPod connection

BMW Z4 (E85) production date 02/06 and up with DSP **without** navigation, CD changer **and** iPod connection

BMW Z4 (E86) coupe production date 05/06 and up with DSP **without** navigation, CD changer **and** iPod connection

These vehicles above do not require GROM DSP adapter (use analog DSP) and can be installed at stereo or trunk, but audio part will not work until the stereo is programmed (retrofitted) to accept CD Changer (bmw calls it "vehicle order"). Please contact your local BMW dealer and ask them to retrofit the stereo to accept CD changer.

If your car falls into the above range **and has** Navigation, CD changer **or** iPod connection, **GROM will work** without any reprogramming.

5. For BMW with SiriusXM satellite radio, the XM radio need to be disconnected in order for GROM to work.

***Radio model FXDD07EF2, Macintosh stereo and Navigation stereo for Subarus are not compatible**

****** There are two types of emulation available: SAT or CDC (satellite or CD changer). **SAT emulation** is applicable to cars within USA only.

The stereo should be SAT capable, and factory SAT must be disconnected in order to gain the usage of GROM adapter.

CDC emulation can be used for all vehicles from the compatibility list (within and outside of USA)

***** COMPATIBLE stereo models include:** GX-806EF2, GX-201JE, GX-201LE, GX-201LH, GX-203JE, GX-204LE, P-206 UNB

NOTE1: Since some applications are different for US/Canada and European markets please check your stereo first. There are two types of the stereo that require either VAGS (Single DIN stereos) or VAGD cable (Double DIN stereos). Single DIN stereo about 2 inches in height (requires VAGS cable); Double DIN stereo about 4 inches in height (requires VAGD cable)

NOTE2: VAG-T cable is for the connection in the trunk.

NOTE3: Must disconnect SAT if port is occupied
